Sir:

Applicants note that both the Official Filing receipt and the published document 2006-0254068 A1 contain an **error**, i.e., the United Kingdom (Great Britain) priority application is erroneously listed as a European patent application. This error is also indicated on the foreign priority tab of PAIR.

The Application Data Sheet, originally submitted with the request for national stage entry on September 14, 2005, correctly identified the priority application, as did the declaration/power of attorney filed with the Response to the Notification of Missing Requirements on June 28, 2006, copies of each of these documents are attached. Accordingly, Applicants respectfully request correction of the PTO records to reflect the fact that the priority application is a United Kingdom (Great Britain) priority application, not a European application. As this is an error generated by the PTO it is believed that there are no charges associated with these corrections. However, if for some reason it is deemed that there is indeed a fee required for these changes, it is respectfully

requested that the PTO charge the deposit account no. 02-4035 of the undersigned.

Respectfully submitted,
